Of the Four Quarters of the Year

11 6 8 7

Of Winter.

Winter Quarter (after the *Astronomer's* Account) began the 12th of December 1686. at 8 of the Clock at night, and continues till the Tenth of March this year 1687. So that always the first part of the Astronomical Winter Quarter, is in one Politick year, and the latter end thereof is in the other. At which time was the shortest day of the year, by reason of the Suns greatest declination from the Equinoctial Line.

This Season, of its own disposition, is known to be cold and moist, contrary to the quality of the Summer; and, in this Quarter, the inward parts of Man are very hot, and being healthful, may receive plenty of Food, because natural heat is now comforted, and is gone inward, and there increaseth, and maketh Digestion the better.

The Sickneses whereunto this Quarter is most inclined, are Rheumes, Gouts, Pashes, Sore-Eyes, Melancholy, Coughs, Catharrs, Sciaticks, Falling Sicknesse, Diseases proceeding of Rottenness and Corrupt Humors; with divers kind of Infirmities incident among Women.

Of the SPRING.

THE Spring-time (being the most pleasant and wholsome Season of the Four) taketh its beginning on Thursday the 10th of March, 28 m. after 7 in the Morning, when the Sun entereth into the first minute of the Equinoctial point *Aries*, making the days and nights of equal length; which Quarter endeth the 10th of June, when the Sun entereth into *Cancer*.

This season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to ease diseased Bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The Infirmities of this Quarter are *Melancholy*, *Madness*, the *Falling-Sickness*, *Bleeding at the Nose*, *Hoarseness*, *Coughs*, *Itch*, *Scales*, many *Ulcers*, and small *Apostumes*, the *Gout*, and *Pain in the Joynts*, *Plurisies*, *Dropsies*, *Pestilent Agues*, *Shortness of Breath*, *Faintings*, *Pain in the Head*, *Eyes*, and *Stomach*, *Rotten Fevers*, and other *Strange Diseases*.

Of SUMMER.

Summer (accounted the Third part of the Year Astronomical) taketh always its beginning

ginning at the time of the Sun's entrance, into the first min. of the Solstitial Sign *Cancer*, which is this year on Saturday the 11 of *June*, 37 min. after 9 in the Morn. at which time he makes his greatest declination from the Equinoctial towards the North, and causeth the longest day, and shortest night in the year; and so Summer holdeth on till the 22 of *September* following.

In this Quarter the Stomach cannot digest such hard Meats as it will in the Winter season, for that natural heat is now distributed into the exterior parts, and man is not now so hot within as in Winter.

The Sickneses at this time are divers, as, *Burning Agues*, *Plurisies*, *Frensies*, *Hot Apostumes*, *Divers pums in the Head*, *Sundry Inflammations*, and *New Infirmities*, proceeding especially of *Hot Cholerick Humours*, wherewith many will be sore molested.

Of AUTUMN or, Harvest.

A *Uumn*, or *Harvest* (being the Fourth, or last Quarter of the Year) beginneth upon Tuesday the 13 of *Sept* at 51 m. past 9 in the Morning the Sun then making his entrance into the first minute of the second Equinoctial Sign *Libra* working the same effect that he did at his entring into *Aries*, that is, making the days and nights of equal length, rising at six in the morning, and setting at six at night; and
this

this Quarter doth last until the eleventh of December following

The quality of this Season is naturally cold and dry, yet, by reason of its mutability, it is the most unwholesome; by means whereof it is more subject to sickness, than any other: for the Dregs of all diseases of the former parts of the year, will now break forth and be seen.

The Diseases of this Quarter are like to be many and dangerous, as Black Jaundies, Malignant the Pulling-Sickness, Opilations in the Spleen, difficulty of Breathing, Convulsion Fits, Phopsies, Sciatica, Biles, Toothach, and many more. From which, good Lord deliver us.

Of the ECLIPSES this YEAR, 1687.

There will be only Two Eclipses this Year, and both of them of the Sun. The one on the First of May, and the other on the 25th of October. And of these Two, only One of them will be Conspicuous to Us in England, and that is that on the First of May, which will be seen near the Meridian at Noon. It will be a great Eclipse, and well worth the observing.

The other Eclipse cannot be seen of Us, in respect the Sun will be under the Horizon.

TH E foregoing Rules for the judgment of the Weather, are such as are deduced from the Aspects of the Planets to the Moon, and among themselves; these here following, are such as are deduced from Philosophical Aphorisms: Therefore

1. The rebounding of the Sea upon the Shore, and the murmur of Winds in the Woods, when the Wind is not stirring abroad, shew Wind to follow.
2. The obscuring of the smaller Stars, forsthe's Tempells.
3. When Stars seem to shoot, Wind comes from that Quarter.
4. If two Rainbows appear, Rain follows: But a Rainbow appearing after Rain, signifies fair Weather.
5. If the Sky be Red in the Morning, it is a sure token of Wind or Rain to follow, or both; for the Vapors which cause that Redness, will soon be dissolved.
6. If the Sun or Moon look pale, look for Rain; if fair and bright, fair Weather; if Red, Wind.
7. If a dark Cloud be at Sun-rising, in which the Sun is soon after hid, it will dissolve it, and Rain will soon follow.
8. If a Cloud appear, and afterwards Vapors are seen to ascend up to it, it portends Rain.
9. If the Sun appear in the East, greater than it usually doth, it is a sign of Rain.
10. If a black Cloud appear in the West about Sun-setting, it will rain that Night, or the Morning following.
11. If Mists come down from the Hills, or descend from the Sky, and settle in the Vallies, it promisetith fair and hot Weather. Also Mists ascending in the Evening from the Earth or Water, shew a hot day to follow.
12. Water Fowls (as Sea-gulls, More hens, &c.) when they flock and flie together from the Sea towards the Shore. As also when Land-Fowls (as Crows, Swallows, &c.) which they fly from the Land to the waters, bearing the waters with their wings, shew Rain and wind.
13. If the Circles about the Sun be red and broken, it portends Wind; if thick and dark, Wind, Snow, or Rain, and the same of the Circles about the Moon.
14. The Trefoil Grass, against Rain, swells in the Stalk, and standeth more upright.
15. The Windpipe (growing in Crabbe Fields) if you find it open in the morning, be sure of a fair day to follow.
16. Aches, Hurts, and Curns, do engrie'e against Rain, Snow, or Frost.
17. Worms coming out of the Earth, Males casting up the Earth, Fleas biting more thap ordinary, are evident Signs of Rain to follow.

The Spirits of Scurvy, Grasp, both Plain and Golden, famous for
curing the Scurvy, Droptic, and other general Distempers,
as they were made by the First Author, Mr. Robert Bateman, who
still continued to be faithfully prepar'd, by a person to whom in his
life time, he communicated the true Process thereof, and are to
be Sold at the same House wherein Mr. Bateman, lately
dwelt at Pauls-Chain London, by M. Hooker his sole Executor
and not else where. The Bottles sealed (as formerly) with his Coat

are the true Spirits, beware of being deceived by upstarts who may
take the advantage of pretending to them.

Of several Diseases incident to CATTEL *with their CAUSES and CURES*

I. *Of the Murrain in an Ox, Cow, or Calf; And how to*
Cure the same.

FOR every Beast that is thus troubled, take a Quart
of old Wash, and lay a good quantity of Horse
dung in deep therein for 8. or 10. hours, then strain it,
and break two rotten Eggs into the juice, and two pen-
niworth of Spicknard; Blend all these together, and
give it the Beast. Before you give them this you must
blood your Beast, and drinck both Horses and Swine.

This Disease cometh several ways, as from rankness of
Blood, from the corruption of Air, or by Infection
from other Cattel. The signs by which you may discover
it are these, (1) they will foam at the mouth, (2) they
will

will blow very thick and short. (3.) Their heart and lights will beat very sore. (4.) Sometimes their Face and Chaps will swell: And (5.) their Eyes will run with water. II. Another Cure for the same.

Let your Beasts blood (be they sick or sound) then take Rhue, Featherfew, Sage, Hyslop, Time, Marjoram, Marygolds, Fenel, Tanke, Lavender, and Spike, of each a small handful, boil them altogether in Spring water, from a Gallon to a Quart, then strain it, and put for every Beast a Pint of strong Ale to the Juice: Then take some long Pepper, green Anniseeds, Pease, Bay-Soft Treacle, Liquoris-Powder, and Butter: Pound all these together, and put them to the Juice and Ale: Then give to every sick Beast a full Pint, and to a sound Beast but half a Pint. *Probatum est.*

III. Of the Garget in the Tongue or Throat, the Cause and Cure thereof.

Sometimes this Disease is caused by eating of poisonous Grass, as Dogs-hane, Goose-foot, Helmer-flowers, and such like; all which are poysonant either to Beasts or Swine, but it often cometh from the Blood.

To cure this Dislemper, first bleed them in the Neck, and if they be swollen under the Jaws, against the throat-boale, then cut a vein under his tongue, to let out the blood and water; then wash the Tongue with Vinegar, Salt, and Burnt-Allom. If the outside be swollen, slit the Hide four-fingers broad every way, and then put in a good handful of Sparagras, Salt and Butter, and stitch some of the hole up again: Then take the quantity of a Mustard-Ball of the bluest Clay you can get: The middle-green Bark of young Elder, a good handful of Salt, some rusty Bacon, and boil them near half an hour in Old Urine, till they be thick as Pap: With this Ointment bathe the Beasts Face from the Ears downwards, and stroak it downwards towards the slit, as hot as you can endure it. Bathe the Beast thus three times a day, and when the Swelling is abated, take Tarr, Fresh Butter and Bees-wax, and anoint the sore place, and it will be presently well.

To prevent this Disease, give your Cattel some Rhue in strong Beer or Ale well mixed and Milk warm. IV.

IV. *Of sore Eyes in Ox, Cow, or Calf.*

THere is a Dislemper in the Eyes called the Inflammation, which cometh by the Blood, and breedeth Blindness, sometimes the Beast sees a little, and sometimes not at all. To cure this, Cord them in the neck, and bleed them very well in the temples, under the eyes, then put in some live honey and burnt allom, mixed together every day, and the eyes will certainly mend.

V. *Another Cure for sore Eyes.*

Burn mutton Bones very well, pound them to powder, and searse them; then take burnt allom, turtee, white Sugar-candy, mix all with the juice of Irie, and it will help them that have a Fleam that cometh by a blow. Also the marrow of a Goose-wing is good to cure the same.

VI. *Another Cure for sore Eyes in Cattel.*

Burn Eggshells between two Tileshads, and when they are burnt pound them and searse them, and with a Quill blow this Powder into the Beasts eye 2 or 3 times a day, and they will mend presently. Also the former Powder and white Sugar-candy mixed with Butter without Salt, into a Salve, the eyes anointed with this 3 times a day, will certainly heal them.

VII. *Of an Arberry, or Wart in any Beast, the Cause & Cure.*

This Disease is most incident to young Beasts under 5 years old: It cometh of blood, and is a spungy kind of flesh, full of blood and water. The Cure is several ways, (1) If it be a great one, take 8 or 10 Horse-hairs, and tie them as hard about it as you can, and in 8 or 10 days time you will see it fall away; then heal it up with unslackt Lime and Honey. (2) If it be a flat one, sear it off with a hot Iron, and heal it up as before. (3) If it be amongst sinews and veins, you must eat it away with Mercury or Rosulger; Then stop the hole with flax and whites of eggs for two days, then heal it up with Powder of unslackt Lime and Honey.

VIII. *Of Madnes in the Head of Cattel, as of Bull, Ox, or Cow. And how to Cure it.*

FOR madnes in the Head, it proceedeth principally from the Blood, and this Disease may easily be discovered: For Beasts thus troubled will reel as they go, will set their head into their

their neck, or against a Wall, Tree, or Gate, so fixed, that a Man or two can hardly move them. For the Cure of this Distemper, the following Receipt is excellent. You must first Cord them in the Neck, and blood them very well in the temples under the eyes, and in the ears; Then give them in a Quart of Strong Ale Fenigrick, Turmerick, Long-Pepper, and Green Aniseeds, of each a like quantity, with some juice of Rhue: Give it them milk-warm, the thinnest half in at the nostrils, the other at the mouth, and it will undoubtedly cure them, if taken in any time.

IX. Of the Yellows in the Bodies of Beasts, the Cause & Cure.

OF all Diseases in Cattel, this is the Original or Forerunner, and it is easily discovered: For Cattel being infected therewith, will be yellow in ears, eyes, end of the tail, and sometimes all over the body. To cure this Distemper, you must bleed them well, both in the ears and tail, rubbing them, that they may bleed the more freely: Then put some Salt into their ears, and give them two handfuls of Salt dry overnight down their throat: In the morning give them Fenegrick, Turmerick, Long-pepper, Aniseeds, and Liquorice made into Powder, and all put into strong Ale milk-warm. This is a certain Cure.

X. Of the Blend-water, the Cause and Cure.

SOME call this Disease, The Morehow: It is occasioned several ways, (1) by Blood. (2) from the Yellows. (3) from change of ground; for hard ground breedeth this. It may be thus cured: Take one penniworth of Bolearmonick, and as much fine flower of Charcole as will fill an Egg shell, and a good quantity of the inner Bark of an Oak dried and pounded; Put all these into a Quart of new Milk, and a Pint of Erning. Give this to the Beast two times, and it will cure him.

There is another Cure for this Distemper which never fails.

TAKE a Quart of new-chernd Milk: Also take a good piece of Lean Salt-hung-beef broiled upon the Coals till it become a Coal it self, and when cold make it into Powder; Take also a penniworth of Bolearmonick pounded, and a handful of Shepherds Purse, put all these together into the milk, and give it the Beast. This Receipt never fails.

XI. Of the Worm in the Tail, the Cause and Cure.

THIS Disease is discover'd by the Tail it self, for sometimes the hair will go off where the Worm is; but most commonly the Joints are eaten a sunder therewith, so that they will knock one against the other, and this is the certain token. It may be thus Cured: Slit the Skin of the under-side above the decayed Joint, and just against the Vein; Then prick the Vein, and let it bleed very well: Then take Garlick, Butter and Salt mixed together, and apply it to the wound, binding it up, and it will soon mend.

XII. Of the Water-Murrain, its Cause, Cure, and Prevention.

THIS Disease is chiefly incident to Beasts under three years old, and is engendered chiefly from rankness of Blood, and if they have not present help they will die. The Disease is easily discovered,

vetes, for they will be swollen on the Back, even to the Chin, and on both sides. To cure them, first let them bleed in the neck, then take Penegrick, Turmeric, Long-pepper and Spikeard, all made into Powder, and given to the Beast in Ale or Beer milk warm, and this will cure the inner cause. For the Swelling, take 4 handfulls of Salt, a little Allom pounded, put both these into a Pint of Spring-water, and as much Vinegar, bearing them with a slice till they be white; With this Liquor bathe the Swollen part often; and it will dry up the Rheume and cure it. The best way to prevent this disease, is to bleed in time. If they swell very much in the back, trowl them on both sides behind the Shoulder Blade signing the heart, putting in some hair to keep the holes open; and they will presently mend.

Conclusion. Thus have I accommodated the honest Country Farmer with 13 excellent Cures for so many several Distempers that may happen to light upon his Cattel; These have been experimented, and found to be very effectual. I have thank much by me, and about such a number you may expect from me every year, who am, The Country-Farmer's Friend.
